

Luke Wood

Summary

As a highly motivated student and aspiring software engineer, I bring a strong work ethic and a deep passion for technology to the table. Currently pursuing a baccalaureate degree in computer science, I've bolstered my academic foundation with extensive programming experience, showcased through a diverse portfolio of projects spanning multiple languages. Committed to continual learning and growth, I actively seek collaborations with like-minded people who share my drive for innovation throughout the technology industry. Notably, one of my standout projects, built with C# within the .NET framework, has garnered over 500 users, highlighting my proficiency and dedication to creating impactful solutions and delivering fully functional products.

I prioritize a balanced lifestyle alongside my career aspirations and education. Embracing a healthy lifestyle fosters resilience and growth in all aspects of my life, while I also value socializing and exploring new destinations with friends.

Experience

BOOKKEEPER/DATA ENTRY 02/2022 - Present

Clearwater Accountants

Utilising accounting software such as Xero, I was responsible for driving the company's digital transformation, focusing on efficient data management, client engagement, and GDPR compliance. This multifaceted role enhanced my proficiency in data security and broadened my expertise in technological innovation within the organisation while gaining experience working directly with customers.

FULLSTACK WEB DEVELOPMENT 02/2024

Clearwater Accountants

For an ongoing project I am completing for a university assignment I had to choose my own project to develop, I took this as an opportunity to gain work experience and I spearheaded the development of a professional website for a local accountancy company, which has demonstrated proficiency in a diverse array of web development techniques and markup languages as well as further developing my skills concerning responsive web design. Leveraging my previous experience in PHP, JavaScript, HTML, and CSS, I orchestrated the creation of a solution to an ongoing problem that the company faces, the lack of an online presence. While effectively catering to the specific needs of the accountancy sector.

FULLSTACK .NET DEVELOPMENT 03/2021 - 12/2023

Personal

In my journey to becoming a software developer, I embarked on a project to create a program in C# that served as a catalyst for deepening my understanding of incorporating APIs effectively and managing user logins through third-party companies, teaching me to work collaboratively and be resourceful where possible. This initiative culminated in the development of a successful application that has a growing user base. Although this project is no longer being maintained it is what inspired me to pursue my studies in computer science.
