Luke Wood

Profile

Full-stack web and software developer with a strong passion for technology, recently awarded a Bachelor's degree in Computer Science with First-Class Honours. I have hands-on professional experience in HTML, CSS, JavaScript, jQuery, PHP, and object-oriented languages such as C# within .NET and Java, while working within agile environments. I'm also proficient in Git version control and test planning through academic and freelance work.

My portfolio includes exciting projects such as a professional website for a local accountancy firm and the development of an AI-driven eLearning platform. I bring strong attention to detail and critical thinking, and I'm eager to contribute to quality-focused projects in either software development or testing. My goal is to collaborate with like-minded professionals to deliver impactful, reliable solutions across the full development life cycle.
